

• 外刊题录 •

Geophysics, Vol. 61, No. 5, 1996

- Inversion technique for recovering the elastic constants of transversely isotropic materials, *P. N. Okoye et al*
- A seismic refraction and reflection study across the central San Jacinto Basin, southern California, *T-C. Lee et al*
- Elastic wave-propagation simulation in heterogeneous media by the spectral moments method, *V. Rousseau et al*
- Elastic waves in finely layered sediments: The equivalent medium and generalized O'Doherty-Anstey formulas, *S. A. Shapiro et al*
- Some refinements of the finite-difference method for 3-D dc resistivity modeling, *S. Zhao et al*
- Conservative modeling of 3-D electromagnetic fields; Part I: Properties and error analysis, *J. T. Smith*
- Conservative modeling of 3-D electromagnetic fields; Part II: Biconjugate gradient solution and an accelerator, *J. T. Smith*
- Magnetic properties of unrusted steel drums from laboratory and field-magnetic measurements, *D. Ravat*
- 3-D seismic evidence of the effects of carbonate karst collapse on overlying clastic stratigraphy and reservoir compartmentalization, *B. A. Hardage et al*
- 3-D seismic imaging and seismic attribute analysis of genetic sequences deposited in low-accommodation conditions, *B. A. Hardage et al*
- Elasticity of high-porosity sandstones: Theory for two North-Sea data sets, *J. Dvorkin et al*
- Multifrequency viscoacoustic modeling and inversion, *Q. Liao et al*
- Wavelet transform in version with prior scale information, *X-G. Li et al*
- Explicit 3-D migration using equiripple polynomial expansion and Laplacian synthesis, *R. Soubaras*
- Finite-difference migration derived from the Kirchhoff-Helmholtz integral, *T. Rühl*
- Implementation of 3-D prestack Kirchhoff migration, with application to data from the Ouachita frontal thrust zone, *D. Epili et al*
- Prestack migration by split-step DSR, *A. M. Popovici*
- Anatomy of diving waves, *F. K. Levin*
- The fluid factor as an AVO indicator, *G. C. Smith et al*
- Comparison of experimental velocity measurements with theoretical results in a solid-solid com-

- posite material, *M. Zhang et al*
- Reducing spurious diffractions in elastic wavefield calculations, *X. Zeng et al*
- Fourier transform approximations for sweeps and phase-encoded sweeps, *S. T. T. Ha et al*
- Precise detection of a P-wave in low S/N ratio signal by using time-frequency representations of a triaxial hodogram, *H. Moriya et al*
- Pitfalls of using conventional and discrete Radon transforms on poorly sampled data, *K. J. Marfurt et al*
- Removal of scattered surface waves using multicomponent seismic data, *B. Blonk et al*
- Shooting direction and crosswell seismic data acquisition, *C. L. Liner et al*
- 3-D seismic reflection tomography on top of the GOCAD depth modeler, *J. L. Guiziou et al*
- Velocity and interface depth determination by tomography of depth migrated gathers, *D. Kosloff et al*

Geophysics, Vol. 61, No. 6, 1996

- Waveform-based AVO inversion and AVO prediction-error, *J. L. Simmons Jr et al*
- AVO inversion of Troll Field data, *A. Buland et al*
- The impact of migration on AVO, *C. C. Mosher et al*
- Multidomain Chebyshev spectral method for 3-D dc resistivity modeling, *S. Zhao et al*
- Modeling of broadband airborne electromagnetic responses from saline environments, *G. Buselli et al*
- Robust statistical methods for reducing sferics noise contamination transient electromagnetic measurements, *G. Buselli et al*
- Wave tilt of radio waves propagating over a layered ground, *J. R. Wait et al*
- High resolution of glacial ice stratigraphy: A ground-penetrating radar study of Pegasus Runway, McMurdo Station, Antarctica, *S. A. Arcone*
- Ground-penetrating radar: Wave theory and numerical simulation in lossy anisotropic media, *J. M. Carcione*
- Geophysical inversion using approximate equality restraints, *W. E. Medeiros et al*
- Thermal analysis of the southern Powder River Basin, Wyoming, *B. J. O. L. McPherson et al*
- Gravity inversion of basement relief constrained by the knowledge of depth at isolated points, *J. W. D. Leão et al*
- Inversion of seismic refraction data using genetic algorithms, *F. Boschetti et al*
- Traveltime inversion for the geometry of aquifer lithologies, *D. W. Hyndman et al*
