

## • 外刊题录 •

### **Geophysics, Vol. 60, No. 3, 1995**

Time-lapse crosswell seismic tomogram interpretation: Implications for heavy oil reservoir characterization, thermal recovery process monitoring, and tomographic imaging technology, *M. E. Mathisen et al*

Crosswell seismic radial survey tomograms and the 3-D interpretation of a heavy oil steamflood, *M. E. Mathisen et al*

Time-lapse crosswell seismic tomography to characterize flow structure in the reservoir during the thermal stimulation, *D. S. Lee et al*

High-resolution crosswell imaging of a west Texas carbonate reservoir: Part 1—Project summary and interpretation, *J. M. Harris et al*

High-resolution crosswell imaging of a west Texas carbonate reservoir: Part 2—Wavefield modeling and analysis, *M. Van Schaack et al*

High-resolution crosswell imaging of a west Texas carbonate reservoir: Part 3—Wavefield separation of reflections, *J. W. Rector III et al*

High-resolution crosswell imaging of a west Texas carbonate reservoir: Part 4—Reflection imaging, *S. K. Lazaratos et al*

High-resolution crosswell imaging of a west Texas carbonate reservoir: Part 5—Core analysis, *R. C. Nolen-Hoeksema et al*

High-resolution crosswell seismic experiment with a large interwell spacing in a west Texas carbonate field, *D. S. Lee et al*

Borehole seismic-source radiation in layered isotropic and anisotropic media: Boundary element modeling, *W. Dong et al*

Borehole seismic-source radiation in layered isotropic and anisotropic media: Real data analysis, *W. Dong et al*

Crosswell seismic study in a seismically poor data area, *D. S. Lee et al*

Acoustic wave-equation traveltime and waveform inversion of crosshole seismic data, *C. Zhou et al*

Crosswell tomographic estimation of elastic constants in heterogeneous transversely isotropic media, *R. J. Michelena et al*

Frequency-domain acoustic-wave modeling and inversion of crosshole data: Part 1—2.5-D modeling method, *Z. M. Song et al*

Frequency-domain acoustic-wave modeling and inversion of crosshole data: Part 2—Inversion method, synthetic experiments, and real-data results, *Z. M. Song et al*

3-D crosswell transmissions: Paraxial ray solutions

and reciprocity paradox, *J. Sun*

Pitfalls in crosshole seismic interpretation as a result of 3-D effects, *I. R. Musti*

Sensitivity analysis of crosswell electromagnetics, *B. R. Spies and T. M. Habashy*

Theoretical and practical considerations for crosswell electromagnetic tomography assuming a cylindrical geometry, *D. L. Alumbaugh et al*

Crosswell electromagnetic tomography: System design considerations and field results, *M. J. Wilt et al*

Cross-borehole resistivity tomography of a pilot-scale, in-situ vitrification test, *B. R. Spies et al*

Crosswell electromagnetic inversion using integral and differential equations, *G. A. Newman*

Crosswell electromagnetic tomography in steel-cased wells, *A. G. Nekut*

On: “3-D true-amplitude finite-offset migration,” (J. Schleicher, M. Tygel, and P. Hubral), by *G. J. O. Vermeer* with reply by the authors

### **Geophysics, Vol. 60, No. 4, 1995**

Model-based inversion of amplitude-variations-with-offset data using a genetic algorithm, *S. Mallick*

An analytical solution to separate *P*-waves and *S*-waves in VSP wavefields, *H. Amano*

Transforming walk-away VSP data into reverse VSP data, *R. Mitter et al*

Walk-away VSP using drill noise as a source, *J. B. U. Haldorsen et al*

The effect of steam quality on the electrical behavior of steam-flooded sands: A laboratory study, *D. B. Butler et al*

Improved Fourier terrain correction, Part I, *R. L. Parker*

Generalized gravity gradient analysis for 2-D inversion, *D. K. Butler*

Heat flow and gravity responses over salt bodies: A comparative model analysis, *J. Corrigan et al*

Numerical calculations of the thermal conductivities of composites: A 3-D model, *F. W. Jones et al*

A field investigation of source parameters for the sledgehammer, *D. A. Keiswetter*

Distortion in resistivity logging at shallow depth, *T. C. Lee et al*

A simple, effective-medium model for water saturation in porous rocks, *C. R. Berg*

Predicting stress-induced velocity anisotropy in rocks, *G. Mavko et al*

3-D seismic tracking with probabilistic data association, *C. A. Woodham et al*

Inversion of reflection traveltimes for transverse

- isotropy, *I. Tsvankin*  
 Robust and efficient upwind finite-difference travel-time calculations in three-dimensions, *W. A. Schneider Jr.*
- Plumes: Response of time migration to lateral velocity variation, *D. Bevc et al*  
 3-D viscoelastic anisotropic modeling of data from a multicomponent, multiazimuth seismic experiment in northeast Texas, *Z. Dong et al*  
 Efficient synthetic-seismogram generation in transversely isotropic, inhomogeneous media, *T. Alkhalifah*  
 Examination of the optimum XY value by ray tracing, *T. M. Leung*  
 Some analyses of 2-D median f-k filters, *G. Duncan et al*  
 High-resolution velocity gathers and offset space reconstruction, *M. D. Sacchi*  
 Passive seismic imaging using microearthquakes, *M. R. Daneshvar et al*  
 On the distribution of seismic reflection coefficients and seismic amplitudes, *S. Painter et al*  
 Geometrical-spreading and ray-caustic decomposition of elementary seismic waves, *P. Hubral*  
 Anisotropic wave propagation through finite-difference grids, *H. Igel et al*  
 Acoustic waves in finely layered media, *J. M. Hovem*  
 Scale-dependent seismic velocity in heterogeneous media, *T. Mukerji et al*  
 Orientation of a downhole triaxial geophone, *S. A. Greenhalgh et al*  
 Uneven effect of random noise in magnetotelluric apparent resistivity definitions, *E. Gómez-Treviño et al*  
 Anisotropic parameters of layered media in terms of composite elastic properties, *J. Brittan et al*  
 An examination of the relationship between time-domain integral chargeability and the Cole-Cole impedance model, *K. Duckworth et al*  
 Q-factor approximation of electromagnetic fields for high-frequency sounding in the 300kHz to 30 MHz range over layered media, *W. L. Anderson*  
 A least-squares minimization approach to depth determination from numerical horizontal gravity gradients, *E.-S. M. Abdelrahman et al*  
 Analytical solution of the borehole resistivity casing problem, *J. R. Wait*  
 Studying the TEM response of a 3-D conductor at a geological contact using the FDTD method, *T. Wang et al*
- Geophysics Vol. 60, No. 5, 1995**  
 Composite distribution inversion applied to cross-hole tomography, *J. D. Clippard et al*  
 Advances of geophysical prospecting for petroleum in marine carbonate areas of the upper Yangtze region, Southern China, *Q. Ou et al*  
 Geophysical prospecting for petroleum in marine carbonate areas of the lower Yangtze region of southern China, *D. Deng et al*  
 3-D resistivity forward modeling and inversion using conjugate gradients, *J. Zhang et al*  
 Investigating the resolution of IP arrays using inverse theory, *L. P. Beard et al*  
 Gravity source moment inversion: A versatile approach to characterize position and 3-D orientation of anomalous bodies, *W. E. Medeiros et al*  
 Linear inversion of gravity data for 3-D density distributions, *G. W. Bear et al*  
 Simultaneous estimation of total magnetization direction and 3-D spatial orientation, *W. E. Medeiros et al*  
 Recognizing surface scattering in ground-penetrating radar data, *J. Sun et al*  
 Seismic attenuation and pore-fluid viscosity in clay rich reservoir sandstones, *A. I. Best et al*  
 Nonbright-spot AVO: Two examples, *C. P. Ross et al*  
 Body-wave radiation patterns and AVO in transversely isotropic media, *I. Tsvankin*  
 Information on elastic parameters obtained from the amplitudes of reflected waves, *W. Debski et al*  
 A statistical methodology for deriving reservoir properties from seismic data, *F. Fournier et al*  
 Error analysis for the seismic PDA tracker, *C. A. Woodham et al*  
 Multiscale seismic waveform inversion, *C. Bunks et al*  
 Gaussian beam depth migration for anisotropic media, *T. Alkhalifah*  
 Prestack depth migration with compensation for absorption and dispersion, *R. Mittet et al*  
 Estimation of anisotropy and anisotropic 3-D prestack depth migration, offshore Zaire, *G. Ball*  
 Finite-difference modeling of faults and fractures, *R. T. Coates et al*  
 Simple time-variant, band-pass filtering by operator scaling, *C. Park et al*  
 Some analytic aspects of a 2.5-D wave equation, *C. L. Liner*  
 Recognition of Ricker wavelets by syntactic analysis, *K. -Y Huang et al*  
 Velocity analysis for transversely isotropic media, *T. Alkhalifah et al*  
 Accuracy study of velocity estimation in 3-D layered models, *V. Sorin*

Estimation of sea-floor wave velocities and density from pressure and particle velocity by AVO analysis, *L. Amundsen et al*

VSP normal moveout stretch, *J. C. Owusu et al*

On: "Migration by fourier transform," (*R. H. Stolt by S. Dutta* with reply by the author)

On: "The application of TEM to Cyprus-type massive sulfide exploration in Cyprus," (*N. J. Cooper and R. Swift*) by *S. Webster* with reply by the authors and response to the reply by *S. Webster*

On: "A 3-D seismic case history evaluating fluvially deposited thin-bed reservoirs in a gas-producing property (*B. A. Hardage, R. A. Levy, V. Pendleton, J. Simmons, and R. Edsen*)" by *M. M. Roksanic* with reply by the authors

#### **Geophysical Prospecting, Vol. 43, No. 4, 1995**

Long period multiple suppression by predictive deconvolution in the  $x$ - $t$  domain, *M. Turhan Taner et al*

Phase inversion deconvolution for long and short period multiples attenuation, *Eugene Lichman et al*

Harmonic resonance structure and chaotic dynamics in the earth-vibrator system, *David Walker*

Imaging beneath an opaque basaltic layer using densely sampled wide-angle OBS data, *C. Samson et al*

Quantitative evaluation of crosshole seismic reflection images using physical model data, *Peter S. Rowbotham et al*

Anisotropic velocity analysis, *C. M. Sayers*

Error estimation and optimization of gravity surveys, *Pierre Keating*

#### **Geophysical Prospecting, Vol. 43, No. 5, 1995**

Reflections from a randomly grooved interface: ultrasonic modelling and finite-difference calculation, *Craig A. Schultz*

Effect of clayey media parameters on the negative response of a coincident loop, *Hesham M. El-Kalioubi et al*

Cancelling directional EM noise in magnetotellurics, *G. Santarato et al*

Surface NMR applied to an electrononductive medium, *D. V. Trushkin et al*

Shallow karst exploration using MT-VLT and DC resistivity methods, *Roger Guerin et al*

Laboratory technique for measurement of spectral induced polarization response of soil samples, *Heikki Vanhala et al*

A new method of quantitative interpretation of SP anomalies produced by a polarized inclined sheet,

*George Skianis et al*

Ground penetrating radar antennae frequencies and transmittor powers compared for penetration depth, resolution and reflection continuity, *Harry M. Foley*

#### **Geophysical Prospecting, Vol. 43, No. 6, 1995**

P-and S-wave anisotropy of a synthetic sandstone with controlled crack geometry, *F. S. Rathore et al*

Phase-shift migration with a variable-length spatial transform—an algorithm for moderately varying lateral velocities, *Alvin K. Benson*

On the application of geophysics in the exploration for copper and chrome ores in Albania, *Alfred Frasher et al*

Monitoring soil contaminations using a contactless conductivity probe, *Ming Huang et al*

Conventional and modern seismic investigations for rock quality determination at a dam site—a case study, *J. Louis et al*

Use of traveltimes skips in refraction analysis to delineate velocity inversion, *H. C. Tewari et al*

Elastic anisotropy due to aligned cracks on porous, rock *Leon Thomsen*

Reflection points and surface points, *Franklyn K. Levin*

Finite-difference elastic wave propagation in 2D heterogeneous transversely isotropic media, *Christopher Juhlin*

#### **《石油物探》, Vol. 34, No. 2, 1995**

利用地震资料和测井约束反演地层参数——一种测井数据的地震外推方法 何樵登 梁光河
