Geophysics, Vol. 55, No. 4, 1990

Model studies of shallow common-offset seismic data, *T. H. Wilson*

Seismic exploration on a floating ice sheet, *C. A. Rendleman* and *F. K. Levin*

Split-step Fourier migration, *P. L. Stoffa*,

On computing ray-synthetic seismograms for anelastic media using complex rays, *D. J. Hearn* and *E. S. Krebes*

Automated interpolation of two-dimensional seismic grids into three-dimensional data volume, *J. C. Kao*, and others

Ray-tracing-based prediction and subtraction of water-layer multiples, *A. J. Calvert*

Accounting for limited spatial aperture in the waveform inversion of p -tau seismograms, *S. L. Dobbs*,

A simultaneous inversion for background velocity and impedance maps, *D. Cao*, and others

Velocity anisotropy in shale determined from crosshole seismic and vertical seismic profile data, *D. F. Winterstein* and *B. N. P. Paulsson*

Gaussian scaling noise model of seismic reflection sequences: Evidence from well logs, *J. P. Todoeschuck*, and others

Amplitude preservation equations for dip moveout, *G. H. F. Gardner* and

D. Forel

SH waves from point sources in anisotropic inhomogeneous media, *A. Ben-Menahem*

Offset-dependent geometrical spreading in a layered medium, *B. Ursin*

Geophysics, Vol. 55, No. 5, 1990

This month in GEOPHYSICS, *Don W. Steeples*

An evaluation of Bristow's method for the detection of subsurface cavities, *T. Lowry* and *P. N. Shive*

Finite-difference calculation of travel-times in three dimensions, *J. E. Vidale*

Robust elastic nonlinear waveform inversion: Application to real data, *E. Crase*, *A. Pica*, *M. Noble*, *J. McDonald*, and *A. Tarantola*

Gravity anomaly separation by Wiener filtering, *R. S. Pawłowski* and *R. O. Hansen*

Reduction of potential field data to a horizontal plane, *M. Pilkington* and *W. E. S. Urquhart*

Incremental pay thickness modeling of hydrocarbon reservoirs, *D. B. Neff*

Estimated pay mapping using three-dimensional seismic data and incremental pay thickness modeling, *D. B. Neff*

Temperature dependence of the electrical resistivity of water-saturated rocks, *F. J. Llera*, *M. Sato*, *K. Nakatsuka*, and *H. Yokoyama*

A new concept in modeling the dielec-

tric response of sandstones, Defining a wetted rock and bulk water system, R. Knight and A. Endres

General theory and comparative anatomy of dip moveout, C. Liner

Harnessing the ghost, S. N. Domenico

Efficient tau-p hyperbolic velocity filtering, A. R. Mitchell and P. G. Kelamis

Frequency-domain elastic wave modeling by finite differences, A tool for crosshole seismic imaging, R. G. Pratt

Geophysics, Vol. 55, No. 6, 1990

This month in GEOPHYSICS, Don W. Steeples, Editor

Analysis of conventional and converted mode reflections at Putah Sink, California, using three-component data, C. Frasier and D. Winterstein

Processing, correlating, and interpreting converted shear waves from borehole data in southern Alberta, W. T. Geis, R. R. Stewart, M. J. Jones, and P. E. Katopodis

Physical properties of deep crustal reflectors in southern California from multioffset amplitude analysis, J. N. Louie

Two-dimensional automatic resistivity inversion technique using alpha centers, H. Shima

Traveltime inversion for dipping layers, large moveouts, and arbitrary source-and-receiver positions, D. J. Dodds

The inversion of time-domain airborne electromagnetic data using the plate model, P. B. Keating and D. J. Crossley

Effects of fluid viscosity on shear-wave attenuation in saturated sandstones, D. Vo-Thanh

Wave velocities in hydrocarbon-saturated rocks, Experimental results, Z. Wang and A. Nur

Solution of the equations of dynamic elasticity by a Chebychev spectral method, D. Kosloff, D. Kessler, A. Queiroz Filho, E. Tessmer, A. Behle, and R. Strahilevitz

Acoustic pulse diffraction by step discontinuities on a plane, Q. Zhang, E. V. Jull, and M. J. Yedlin

Implicit static corrections in prestack migration of common-source data, G. A. McMechan and H. W. Chen

A shallow seismic reflection survey in basalts of the Snake River Plain, Idaho, R. D. Miller and D. W. Steeples

Static corrections from shallow-reflection surveys, D. W. Steeples, R. D. Miller, and R. A. Black

Ground roll, Rejection using adaptive phase-matched filters, R. B. Herrmann and D. R. Russell

Noniterative three-dimensional inversion of magnetic data, A. M. Pushtisek

Representation of seismic sources in the one-way wave equation, C. P. A. Wapenaar
