

## · 外刊題录 ·

**Geophysics, Vol. 55, No. 1, 1990**

Three-dimensional time-slice migration, *M. Karrenbach*

Pattern analysis of seismic records, *L. H. T. Le and E. Nyland*

The electrical field in a borehole with a casing, *A. A. Kaufman*

Inversion of *P* and *SV* waves from multicomponent offset vertical seismic profiles, *C. Esmersoy*

A direct comparison between vibrational resonance and pulse transmission data for assessment of seismic attenuation in rock, *D. P. Blair*

Surface-to-volume ratio, charge density, nuclear magnetic relaxation and Permeability in clay-bearing sandstones, *P. N. Sen, C. Straley, W. E. Kenyon, and M. S. Whittingham*

Thermal infrared exploration in the Carlin trend, northern Nevada, *K. Watson, F. A. Kruse, and S. Hummer-Miller*

Magnetic interpretation in three dimensions using Euler deconvolution, *A. B. Reid, J. M. Allsop, H. Granser, A. J. Millett, and I. W. Somerton*

A vertical array method for shallow seismic refraction surveying of the sea floor, *J. A. Hunter and S. E. Pullan*

The validity of *Q* estimates from borehole data using spectral ratios, *M. Sams and D. Goldberg*

Gravity terrain corrections calculated using digital elevation models, *A. H. Cogbill*

On the construction and efficiency of staggered numerical differentiators for the wave equation, *M. Kindelan, A. Kamel, and P. Sguazzero*

Drilling-induced isothermal remanent magnetization, *M. Pinto and M. McWilliams*

On: "Application of three-dimensional interactive modeling in gravity and magnetics (H. J. Götze and B. Lahmeyer), by V. I. Starostenko with reply by the authors

**Geophysics, Vol. 55, No. 2, 1990**

Geophysical exploration for gold—A review, *H. A. Doyle*

Reflection shear-wave data collected near the principal axes of azimuthal anisotropy, *H. B. Lynn and L. A. Thomsen*

Prestack amplitude analysis methodology and its application to seismic bright spots in the Po Valley, Italy, *A. Mazzotti*

Hole geometry and anisotropic effects on tube-wave propagation: A quasi-static study, *L. M. A. Nicoletis, A. Bamberger, J. A. Quiblier, P. Joly, and M. Kern*

Wave separation and feature extraction of acoustic well-logging waveforms using Karhunen-Loeve transformation, *K. Hsu*

Hyperbolic traveltime analysis of first

- arrivals in an azimuthally anisotropic medium: A physical modeling study, *D. A. Ebrom, R. H. Tatham, K. K. Sekharan, J. A. McDonald, and G. H. F. Gardner*
- Seismic traveltimes inversion for transverse isotropy, *B. S. Byun and D. Corrigan*
- A transparent boundary for finite-difference wave simulation, *L.T. Long and J. S. Liow*
- North Sea reservoir description: Benefits of an elastic migration/inversion applied to multicomponent vertical seismic profile data, *W.B. Beydoun, M.M. Mendes, J. Blanco, and A. Tarantola*
- Reduction to the pole of the North American magnetic anomalies, *J. Arkan-i-Hamed and W. E. S. Urquhart*
- Analysis of gravity anomalies of sedimentary basins by an asymmetrical trapezoidal model with a quadratic density function, *D. Bhaskara Rao*
- Gravimetric terrain corrections by the triangular-element method, *X. Zhou, B. Zhong, and X. Li*
- Two-dimensional mapping of sea-ice keels with airborne electromagnetics, *G. Liu and A. Becker*
- Background restoration of dip-filtered data, *S. C. Hornbostel and G. W. Bishop*
- Geophysics**, Vol. 55, No. 3, 1990
- Velocity-depth ambiguity of reflection traveltimes, *S. H. Bickel*
- Radon transform migration below plane sloping layers, *D. A. Bisset and T. S. Durrani*
- Nonlinear inversion of seismic reflection data in a laterally invariant medium, *A. Pica, J. Diet, and A. Tarantola*
- Gridding with continuous curvature splines in tension, *W. H. F. Smith and P. Wessel*
- Modeling acoustic waves with paraxial extrapolators, *R. W. Graves and R. W. Clayton*
- Dipmeter analysis by a Monte Carlo technique, *W. A. Schneider, Jr. and W. W. Whitman*
- Three-dimensional gravity or magnetic constrained depth inversion with lateral and vertical variation of contrast, *D. Chenot and N. Debeglia*
- An automated method for the interpretation of magnetic vertical gradient anomalies, *P. Keating and others*
- Magnetic forward models of Cement oil field, Oklahoma, based on rock magnetic, geochemical, and petrologic constraints, *R. L. Reynolds, and others*
- Incorporation of topography into two-dimensional resistivity inversion, *L. Tong and C. Yang*
- Deep subpermafrost thermal regime in the Mackenzie Delta basin, northern Canada—Analysis from petroleum bottom-hole temperature data, *J. A. Majorowicz, and others*
- On thin-layer telluric modeling of magnetotelluric responses, *P. E. Wan-*

- namaker*
- Geophysical Prospecting, Vol. 33, No. 1, 1990**
- Tutorial: Efficient multichannel filtering of seismic data. *Hüseyin Özdemir and Ruhi Saatçilar*
- Elastic extrapolation of primary seismic P-and S-waves. *C. P. A. Wapenaar and G. C. Haimé*
- Improved low-frequency decay estimation using the multitaper spectral analysis method. *A. T. Walden*
- Efficient computation of transient sounding curves for wire segments of finite length using an equivalent dipole approximation. *C. H. Stoyer*
- Comment on "A review of least-squares inversion and its application to geophysical problems" by L. R. Lines and S. Treitel. *P. H. Nielsen, Larry R. Lines and Suen Treitel*
