

• 外刊题录 •

Geophysics, Vol. 61, No. 3, 1996

A limitation of well velocity surveys in highly deviated wells drilled parallel to bedding, *J. M. Smidt Monte Carlo simulation of wells, P. F. M. de Groot et al*

Fast inversion of formation permeability from Stoneley wave logs using a simplified Boit-Rosenbaum model, *X. Tang et al*

Quasi-linear approximation in 3-D electromagnetic modeling, *M. S. Zhdanov et al*

Underground imaging by frequency-domain electromagnetic migration, *M. S. Zhdanov et al*

Velocity variations and water content estimated from multi-offset, ground-penetrating radar, *R. J. Greaves et al*

Dewarping the composite aeromagnetic anomaly map of Australia using control traverses and base stations, *C. Tarlowski et al*

Lithologic analysis from multispectral thermal infrared data of the alkalic rock complex at Iron Hill, Colorado, *K. Watson et al*

Dielectric dispersion of salt-water-saturated porous glass containing thin glass plates, *E. Haslund et al*

2-D acoustic wave equation inversion combining plane-wave seismograms with well logs, *S. Wang et al*

A unified approach to 3-D seismic reflection imaging, Part I: Basic concepts, *P. Hubral et al*

A unified approach to 3-D seismic reflection imaging, Part II: Theory, *M. Tygel et al*

Finite-difference depth migration of exploration-scale 3-D seismic data, *J. R. Mufti et al*

True-amplitude migration taking fine layering into account, *C P. A. Wapenaar et al*

Inversion versus migration: A new perspective to an old discussion, *C P. A. Wapenaar*

An accurate formulation of log-stretch dip moveout in the frequency-wavenumber domain, *B. Zhou et al*

Suppression of sea-floor-scattered energy using a dip-moveout approach—Application to the mid-ocean ridge environment, *G. M. Kent et al*

Fowler DMO and time migration for transversely isotropic media, *J. Anderson et al*

Analysis of higher-order, finite-difference schemes in 3-D reverse-time migration, *W. -J Wu et al*

Wavefronts in dissipative anisotropic media: Comparison of the plane-wave theory with numerical modeling, *J. M. Carcione et al*

Comparison of 2-D numerical viscoelastic waveform modeling with ultrasonic physical modeling, *G. Chen*

Instantaneous polarization attributes and directional filtering, *I. B. Morozov et al*

Fast algorithms to design discrete Wiener filters in lag and length coordinates, *M. J. Porsani et al*

Optimum weighted stack for multiple suppression, *M. Schoenberger*

Nonlinear waveform tomography applied to cross-hole seismic data, *D. T. Reiter et al*

Geophysical Prospecting, Vol. 44, No. 4, 1996

Seismic inversion through Tabu search, *R. Vinther et al*

Reflection from a deep interface in a strongly heterogeneous layered medium, *P. Lewicki et al*

Evaluation of transport and storage properties in the soil and groundwater zone from induced polarization measurements, *F. D. Börner et al*

A numerical laboratory for simulation and visualization of seismic wavefields, *F. J. Sero'n et al*

Event-oriented velocity estimation based on prestack data in time or depth domain, *E. Iversen et al*

A physical model for shear-wave velocity prediction, *S. Xu et al*

Seismic migration and absorbing boundaries with a one-way wave system for heterogeneous media, *N. Dai et al*

《石油物探》, Vol. 35, No. 2, 1996

一种新的分形油气检测方法 肖创柏等

三分量数据的偏移分析及应用 黄中玉等

非线性 $K-L$ 滤波及其在反射地震资料处理中的应用 杨文采

斜三分量地震资料的常规处理 冯太林等

初始模型和约束条件对层析反演结果的影响 刘清林

小波变换在地震资料高分辨处理中的应用 何光明等

用一种震源设备实现多波 VSP 观测的可能性 刘永华等

地震反射序列谱幂指数的求取 傅旦丹等

AVO 技术在济阳拗陷浅层气勘探中的应用 李国林等

高精度重磁测量弱信号分析及其在塔北雅克拉地区的应用 刘天佑等

用面波反演风化层 Q 值——补偿风化层吸收提高分辨率 刘学伟等

确定最佳地震采集参数的试验方法 雍凤军

模糊模式识别法在低含油饱和度、低电阻率油气层中的应用 陈曜岑

沙漠地区一种有效的地震勘探野外施工方法——等高面积组合法 陈凯等

下扬子北部地区电性参数分析 杨子建
